

What Is Claimed Is:

1. A bundle of nozzles for vacuum sealing a plastic bag, the bundle of nozzles comprising a plurality of nozzles made of a heat sealable material in order to
5 be inserted into the plastic bag and heat sealed together with the plastic bag, the plurality of nozzles being coupled to one another along the outer peripheral surfaces thereof so that first air discharging passages are formed near a coupling portion between two adjacent nozzles.

10 2. The bundle of nozzles according to claim 1, wherein each of the plural nozzles has an embossing part formed on the peripheral surface thereof, so that second air discharging passages are formed on the peripheral surface of the each nozzle.

15 3. The bundle of nozzles according to claim 2, wherein the embossing part is formed on the inner peripheral surface of the each nozzle.

4. The bundle of nozzles according to claim 1, wherein each of the plural nozzles has a plurality of break lines formed at predetermined regular intervals on the
20 outer periphery surface thereof, for cutting the each nozzle to a predetermined length.

5. The bundle of nozzles according to any one of claims 1 to 4, wherein each of the plural nozzles has a plurality of through holes formed on the outer peripheral surface thereof.
